

1. ERP means
(A) Enterprise Resource Programming
(C) Enterprise Resource Planning
- (B) Enterprise Recruitment Planning
(D) Enterprise Revenue Planning
2. In order to convert the selected sentence's letters into "Capital letters" or "Small letters", one of the following is normally used.
(A) Change word
(C) Change sentence
- (B) Change letters
(D) Change case
3. Google Drive gives the facility of Cloud Storage maximum up to _____ GB for free.
(A) 10 GB
(C) 20 GB
- (B) 15 GB
(D) 15 GB
4. How many bits are there in an IP address?
(A) 32
(C) 22
- (B) 28
(D) 12
5. _____ enables devices to communicate without the use of Physical cables.
(A) HTML
(C) Wi-Fi
- (B) HTTP
(D) GPRS
6. Barrel chest is a characteristic symptom in
(A) Pneumothorax
(C) Empyema
- (B) Bronchiectasis
(D) Emphysema
7. Percentage of O₂ in inspired air is
(A) 21%
(C) 52%
- (B) 16%
(D) 78%
8. In human the thirst centre is located in the
(A) Adrenal cortex
(C) Hypothalamus
- (B) Pons
(D) Medulla oblongata
9. Parathyroid hormone act to
(A) Decrease Calcium absorption in gut
(B) Decrease Calcium reabsorption in renal tube
- (C) Increase plasma Calcium level
(D) Increase osteoblast activity
10. Enzyme heparin and histamine are secreted by
(A) leucocytes
(C) Fat cells
- (B) Mast cells
(D) RBCs
11. The interval between the exposure to infection and the appearance of the first symptom is known as
(A) Latent period
(C) Incubation period
- (B) Sensitivity period
(D) None of these

12. Universal immunization program was started in
(A) 1995 (B) 1985
(C) 1990 (D) 1995

13. Koplik's spots are seen in
(A) Rubella (B) Rubeola
(C) Typhoid (D) Chicken pox

14. Bucks extension belongs to a method of traction
(A) Russel (B) Muscles ✓
(C) Skeletal (D) Skin

15. The most common cause of blindness in India is
(A) Cataract (B) Trachoma
(C) Refractive errors (D) Vitamin A Deficiency

16. Menopausal women are at risk of
(A) High HDL (B) Pregnancy
(C) Osteoporosis (D) Hypotension

17. Sentinel surveillance is done to
(A) Known the total number of cases (B) Known the hidden cases ✓
(C) Known natural history of disease (D) Plan intervention

18. Temporary hardness of the water is removed by
(A) Boiling (B) Filtration
(C) Chlorination (D) All of these

19. Following committee is also known as Health survey and development committee
(A) Mudaliar Committee (B) Shrivastav Committee
(C) Mukharji Committee (D) Bhore Committee

20. An Anganwadi worker is trained for
(A) 3 months (B) 4 months
(C) 5 months (D) 6 months

21. Cataplexy is a symptom of
(A) Narcolepsy (B) REM sleep
(C) OSAS (D) Primary Hypersomnia

22. Following drug is given to prevent HIV transmission from Mother to child
(A) Lamivudine (B) Stavudine
(C) Nevirapine (D) Abacavir

23. Meaningless repetition of words or phrases
(A) Echoparaxia (B) Echolalia
(C) Extinction (D) Flooding

24. Hydatidiform mole is an abnormal condition affecting
(A) Villi (B) Amnion
(C) Chorion (D) Blastomere

25. A women had just given birth at 42 weeks gestation, When assessing the neonate which physical finding is expected?
(A) Lanugo covering baby
(C) Desquamation of the epidermis
26. Powerhouse of the cell is
(A) Nucleus
(C) Golgi bodies
27. Sino-Atrial (SA) node is located in
(A) Right atrium
(C) Left atrium
28. The classical method used in bringing down an arm in breech presentation is called
(A) Retgen'smanuver
(C) Crede'smanuver
29. Abnormal condition in which the umbilicus is inserted through the membrane of placenta is known as
(A) Succenturiate
(C) Marginal
30. The extreme softening of the cervix during the first trimester is known as
(A) Chadwick's sign
(C) Piskacek's sign
31. What is the normal color of amniotic fluid when the bag of water ruptures
(A) Clear
(C) Brownish
32. What is fertilisation life span or viability for oocyte
(A) <12 hr
(C) 24-48 hrs
33. Following condition is seen often in patients with gonorrhoea
(A) Trachoma
(C) Herpes
34. Hormone responsible for ovulation is
(A) FSH
(C) Estrogen
35. Formula to calculate intelligence quotient (IQ) is
(A) Chronological age / mental age $\times 100$
(B) Mental age – Chronological age $\times 100$
(C) Mental age / Chronological age $\times 100$
(D) Mental age + Chronological age $\times 100$

36. In a healthy child the head and chest circumference equal to each other around the age of
(A) 3-6 month (B) 6-9 month
(C) 9-12 month (D) 12-15 month
37. If a narrow cuff is used for measuring BP, then the outcome will be
(A) Actual reading will be obtain
(B) Falsely high reading will be obtained
(C) Falsely low reading will be obtained
(D) BP can't measure
38. Urine bile can be tested through
(A) Hay's test (B) Benedict test
(C) C.Fehling's test (D) Cold test
39. Infection occurs following treatment modality or procedure is known as
(A) Iatrogenic infection ✓ (B) Nosocomial infection ✓
(C) Concurrent infection (D) Fomite infection
40. All of the following are the neuro transmitters EXCEPT
(A) Dopamine ✓ (B) GABA ✓
(C) Serotonin (D) Troponin
41. Damage to following leads to Gullain-Barré syndrome
(A) Brain parenchyma (B) Peripheral nervous system ✓
(C) Spinal cord (D) Thyroid gland
42. Complaints of pain of the elderly patient is to be carefully assessed because Older people
(A) Have increase tactile perception (B) Often experience chronic pain
(C) Have decreased pain threshold (D) Have reduced sensory perception
43. The emergency room nurse is assessing an adult patient who was brought in following a Road Traffic Accident. Which of the following manifestation could have resulted from sympathetic nervous system stimulation?
(A) Increased awareness and attention
(B) Decreased physiologic functioning
(C) Increased salivation
(D) Rapid pulse and increase respiratory rate
44. An assessment specific to safe administration of IV mannitol is
(A) Vital sign 4hr (B) Weighing daily
(C) Hourly urine output (D) Level of consciousness
45. Inability to speak or understand the spoken words is known as
(A) Agnosia ✗ (B) Apraxia
(C) Aphasia (D) Insomnia ✗
46. Following term is used to describe edema of the optic nerve
(A) Angioneurotic edema (B) Papilledema
(C) Glaucoma (D) Lymphedema

36. In a healthy child the head and chest circumference equal to each other around the age of
(A) 3-6 month (B) 6-9 month
(C) 9-12 month (D) 12-15 month
37. If a narrow cuff is used for measuring BP, then the outcome will be
(A) Actual reading will be obtain
(B) Falsely high reading will be obtained
(C) Falsely low reading will be obtained
(D) BP can't measure
38. Urine bile can be tested through
(A) Hay's test (B) Benedict test
(C) C.Fehling's test (D) Cold test
39. Infection occurs following treatment modality or procedure is known as
(A) Iatrogenic infection ✓ (B) Nosocomial infection ✓
(C) Concurrent infection (D) Fomite infection
40. All of the following are the neuro transmitters EXCEPT
(A) Dopamine ✓ (B) GABA ✓
(C) Serotonin (D) Troponin
41. Damage to following leads to Gullain-Barré syndrome
(A) Brain parenchyma (B) Peripheral nervous system ✓
(C) Spinal cord (D) Thyroid gland
42. Complaints of pain of the elderly patient is to be carefully assessed because Older people
(A) Have increase tactile perception (B) Often experience chronic pain
(C) Have decreased pain threshold (D) Have reduced sensory perception
43. The emergency room nurse is assessing an adult patient who was brought in following a Road Traffic Accident. Which of the following manifestation could have resulted from sympathetic nervous system stimulation?
(A) Increased awareness and attention
(B) Decreased physiologic functioning
(C) Increased salivation
(D) Rapid pulse and increase respiratory rate
44. An assessment specific to safe administration of IV mannitol is
(A) Vital sign 4hr (B) Weighing daily
(C) Hourly urine output (D) Level of consciousness
45. Inability to speak or understand the spoken words is known as
(A) Agnosia ✗ (B) Apraxia
(C) Aphasia ✓ (D) Insomnia ✗
46. Following term is used to describe edema of the optic nerve
(A) Angioneurotic edema (B) Papilledema
(C) Glaucoma ✗ (D) Lymphedema

47. T wave inversion on ECG are seen in the following condition EXCEPT
(A) Hyperkalemia ✓
(B) MI ✓
(C) Myocarditis ✓
(D) Subarachnoid haemorrhage
48. Following condition is accompanied by distant, muffled heart sound and prominent neck vessels
(A) Cardiogenic shock
(B) Cardiac tamponade
(C) Pulmonary embolism
(D) Dissecting aortic aneurism
49. Normal cardiac output is
(A) 1-2 L/min
(B) 3-4 L/min
(C) 5-6 L/min
(D) 7-8 L/min
50. Mode of transmission of Hepatitis E virus is
(A) Sexual
(B) Blood transfusion
(C) Injections
(D) Fecal-oral
51. Platelets can be stored at
(A) 20-24° C for 5 days
(B) 20-24° C for 8 days
(C) 4-8° C for 5 days
(D) 4-8° C for 8 days
52. Following is the ideal temperature of the new born resuscitation room
(A) 36-39° C
(B) 32-34° C
(C) 28-30° C
(D) 25-27° C
53. Following vaccine is contraindicated in child with history of convulsion
(A) DPT
(B) BCG
(C) Measles ✓
(D) Typhoid
54. Drug used for closing patent ductus arteriosus in a new born is
(A) Paracetamol
(B) Ibuprofen ✓
(C) Mefenamic acid
(D) Prostaglandins ✓
55. Commonly used shunt in hydrocephalus management
(A) Ventricular atrial
(B) Ventriculo Pericardial
(C) Ventriculo Peritoneal
(D) Ventriculo pleural
56. Most suitable position for a child who come to OPD with complain of Epistaxis
(A) Supine
(B) Prone
(C) Sitting
(D) Lithotomy
57. Psychosocial development of children is proposed by
(A) Erikson
(B) Freud
(C) Piaget
(D) Kohlberg
58. Hormone responsible for maintenance of pregnancy is
(A) Progesterone
(B) Estrogen
(C) Human placental lactogen
(D) HCG

82. Ministry of Youth Affairs & Sports, recently, changed the name of the "Khel Ratna Awards" to _____.
(A) Major Dhyanchand Khel Ratna Award
(B) Arjun Award
(C) Rajiv Gandhi Khel Ratna Award
(D) Dronacharya Award
